

BELLY & BODY BUTTER

Moisturize • Soften Skin • Improve Texture

Our all natural Belly & Body Butter contains highly concentrated amino acids that make it more effective than ordinary creams and lotions.

Our moisturizing Belly & Body Butter is a silky, concentrated, emulsion that refines dry skin to a lovelier, softer texture as it helps protect against moisture loss. This rich, smooth cream is not limited to just the belly; it is an excellent total body moisturizer.

Unique to our cream is that it includes collagen and elastin. Healthy skin needs both substances. Collagen encourages the skin to continue producing moisture while elastin helps to firm the skin. While other companies use liquid elastin extract with 10% amino acids, Robelyn uses a powder freeze-dried elastin concentrate with almost 100% amino acids. Ten times the potency of other elastin or standard body creams, balms, or lotions. It is obviously much more time-consuming and expensive to blend the powder into a cream, but Robelyn feels the results are worth it.

8 OZ. Bottle

MSRP **\$16.95 ea.**
